"Your Hardware Merchants"

Neighbors Surprise  
Goodnight Family  
Who Are Leaving The  
District Soon

Mr. and Mrs. Jesse Goodnight were surprised on Monday evening when about 80 friends went to wish them farewell, they are leaving the district to reside in the States. In presenting Mrs. Goodnight with a purse of silver, Mrs. E. C. Alcock expressed the sentiments of all present, in saying how sorry we are to see them go, as a family that has grown up amongst us as they have, can be badly spared and will be greatly missed, and we wish them all success in their new home.

CHAMPION CON. SCHOOL  
Examination Report

June 1937

Grade IX  
The letter gradings to be interpreted as follows:  
H—80 or over, (Honours)  
A—60 to 79% (Unconditional promotion)  
B—40 to 59% (Student promoted but obliged to restrict his choice of academic subjects)  
C—30 to 39% (Student promoted but must take a non-academic course)  
D—below 30% (Failure)

Walter Anderson—A, James Brown—A, Phyllis Chamberlain—A, Leslie Christensen—A, Richard Deque—A, Margaret Feth—A, Yvonne Griffin—A, Harold Firth—B, Margaret Gaten—B, Eva Latif—B, Donald Lee—B, Kenneth McMahon—B, Hilda Gittel—C, Joseph Warren—C.

High School  
In the following report, the first number after each name is the number of subjects written and the second is the number passed.

Grade X  
Anna Baker 8-8, Louretta Clero 8-4, Ruth Deque 7-7, Anna Goodnight 6-3, Ruth Jopling 7-6.

Grade XI  
James Anderson 5-4, Harold Bach 6-6, Harold Birkens 5-8, Elizabeth Caldwell 7-6, Dorothy Ditt 6-2, Douglas Dow 7-4, Jerry Fath 8-6, Frank Griffin 6-4, George Hargrave 5-2, Hugh Miller 7-4, Michel Vang 7-4, Leonard Vande 7-4.

Grade XII  
John Bastin 3-2, Rex Caldwell 7-6, Jack Chapman 8-8, Maxine Ditt 6-7, Barbara Firth 6-1, Anne Ellis 7-7, Eva Fisher 8-8, Helen Higgins 7-7, Evelyn Kramer 9-6, Richard Latif 6-3, Dorothy Melton 2-2, Marie Melch 7-7, Leslie Nichol 7-5, Mary Sison 9-4, Lona Stephenson 3-2, Howard St. Peter 6-4, Elsie Taylor 8-7, Thora Wellman 7-3, Ada Williamson 4-3.

In Grades X, XI and XII 237 units were written and 177 passed making a pass of 74.6%.

## THE PURPOSE OF POOL ELEVATORS

The major function of the Alberta Wheat Pool elevators is to give support to the natural aspirations of Alberta farm people for more secure, comfortable and happier farm homes.

Every Pool elevator may be said to be a sentinel guarding the marketing interests of the grain producers in that locality. It also serves as a link connecting all parts of a great democratic movement, working on behalf of the men and women engaged in Canada's basic industry.

Every grain grower can aid himself and the entire agricultural industry by hauling his grain to a Pool Elevator.

By so doing, a useful and serviceable farmer-owned organization is strengthened; the non-profit co-operative movement is advanced, and a greater degree of unity is attained among the grain growing farmers.

DELIVER YOUR GRAIN TO—  
ALBERTA POOL ELEVATORS

## LOCALS

Mrs. W. A. McIntyre was a tea hostess, Tuesday.

Mrs. Bouzyan and Bill Bouzyan of Stavely were Champion visitors, Tuesday.

Mrs. E. Sison of Calgary spent a few days visiting in town last week.

Rev. Peter Dawson, M. L. A. was a Champion visitor over the week end, returning to Calgary Sunday.

Miss Jean Hagg left last week for Kent, Washington where she will attend high school this year.

The thirty-third annual Fall Live Stock Show and Sale of Sheep and Swine will be held in Calgary for three days, October 20, 21 and 22.

Mrs. Roy Taylor and family are visiting Mrs. Taylor's father and mother, Mr. and Mrs. E. Williamson of Forest Lawn.

Miss Valerie Ellwood has accepted an invitation to conduct dancing classes in Grand Prairie during the coming fall and winter. She will therefore not be returning to Southern Alberta.

Miss Helen Collins, who has spent the holidays with her parents at Alix, was a recent visitor in Champion enroute to Warner, where she will teach for the ensuing year.

Under the auspices of Champion B. P. O. E. a Harvest dance will be held in the Community hall on Friday evening, Sept. 3rd. The Waterton Lakes orchestra will supply the music. It should be counted upon as the event of the season in the dance line.

Tom Blower, 23, employed as a mechanic in the tobacco works of John Players & Sons, Nottingham, became the 24th person to swim the English channel, after completing the crossing from Cape Gris Nez, France. His time was 13 hours, 21 minutes. Mr. Blower is a first cousin to Mrs. W. M. Diemer.

Difficulty is being encountered by students from rural districts, who desire to take their high school in Champion this year, in securing places to room and board. Practically every available place is taken and other residents are being besieged by anxious students. Several families are also making an effort to move in to avoid the troubles encountered last year with the impassable roads and in consequence houses are at a premium.

Mrs. Jane Dawson, aged 81, mother of Rev. Peter Dawson, M. L. A., died at the home of her daughter, Mrs. J. Lindsay, Calgary, on Thursday, August 26th.

Mrs. Dawson was born in Paton, Ayrshire, Scotland, and came to Calgary 15 years ago. She leaves to mourn five sons, Rev. Peter Dawson, Champion; John, Lion's Head, Ont.; Alex. Looma, Alta., William, Swift Current, Sask.; and James, Edmonton; two daughters, Mrs. J. Lawrence, Gravelly, Ont., and Mrs. Lindsay.

The Champion Ladies' Social Credit Group will meet at the home of Mrs. A. Versluys on Tuesday, September 7th, at 8 p.m. Those wishing transportation please be at the church at 2.30.

Mr. and Mrs. W. M. Diemer and family were Calgary visitors on Sunday.

Another honor has come to Champion through our M. L. A., Rev. Peter Dawson, who this week received the Coronation M. L. A. medal from His Royal Highness King George VI.

Deliveries of new wheat continue to show good quality and weight and yields continue good, in many respects being better than expected. Frost has been reported damaging some delicate plants. With the exception of a few days weather has been ideal for harvesting.

Rev. J. J. Kidder, who is on a business and pleasure trip from the U. S. A. will hold services in the Alston Community hall, Sunday, Sept. 5th, at 8 p.m.

Will the members of the Anglican congregations at Champion and Carmangay please note a change in the schedule of services: Champion, 1st Sunday in the month, morning; 4th Sunday, 3 p.m. Carmangay, 3rd Sunday, morning; 5th Sunday 3 p.m. This brings the Rev. T. B. Winter to the Champion Community hall at 11 a.m. for Holy Communion on the 5th inst.

School opened on Wednesday and there was the usual rush for the many accessories required by pupils, making quite a stir in town. The staff is the same as last year with R. I. Baker, principal, S. Lindstedt and Mrs. E. Schultz in charge of the High School and R. D. Farries, Miss Agnes Holm and Miss Aileen McCullough in charge of the public school.

The following teachers are in charge of the country schools adjacent to Champion:

Harmony, Miss Agnes Patterson; Yule, Miss Gladys Anderson; Blusson, Miss Rheta Campbell; Sanderson, Viorice Wellman; Hiawatha, Roy Robinson; Harper, Miss Alice Taylor; Long Coulee, Miss Elsie McLean; Fireguard, Miss Geraldine Farmer.

If there were fewer radios and automobiles, more one and two acre lots and a flock of chickens, and a garden patch and the consequent chores for sons and daughters, there would be less child problems and less suffering from hard times and unemployment.

## Oil Products Relatively Lower In Price

Throughout the last seven years of economic disturbance and price fluctuations, it is a fact that oil products have been relatively lower in price than other commodities. For example, for more than 27 months in a quiet recent period, the field or posted price of crude oil produced in the mid-continent and south-west areas, was unchanged, except for small adjustments in fields with a limited supply. On January 9, 1933, prices were advanced throughout the region. In some fields the advances were 10 cents a barrel, in others 15 cents.

During this period, and for some time before, the oil industry itself, co-operating with authorities in the principal oil-producing states, worked successfully to bring about a condition under which crude oil production was held to the market demand for it.

This is a policy in which the public interest is much concerned. On the one hand it means greater conservation of petroleum resources by keeping the crude in the ground until it is needed. It likewise effectively answers much of the agitation concerning oil product prices, much of it founded on misunderstanding, and some of it on misinformation.

## THE WORLD OF WHEAT

By H. G. L. STRANGE,  
Searle Grain Company, Limited

"De mult barles, she lak' de woman. To get best result mus' know her. Besides, de feller w'at drink de beer is plantin' particulaire. So farmer d'at grow de malt barley mus' be plantin' particulaire also."

This was the sage advice given to me by Philippe, one of the best hired men who ever come out of Quebec. Philippe's father was "moss' smart man for grow malt barley."

Philippe helped me to win many a dollar for making premiums. Here is his advice, much in his own words:

1. "Mus' use O. A. C. vint et un d'at's twenty-one you know."
2. "Neveaire cut crop till she's ripe. Green kernel mak' de poor malt."
3. "To kip size colour, fit good night-cap on stock for kip away de dew and rain, den thresh de crops separate for feed."
4. "Mus' try kip one-night, maybe one-quarter inch awn on barley. Neveaire skin de kernel. To do dis mus' run thresh machine more slow dan for de wheat. Den tak' out moss' all concave. Maybe if barley too dry, use wood concave same as for wheat de sieve. Separator man sell de wood concave 'ben marche."
5. "If kernel still skin den feed de lundies back into thresh machine."

Those who are planning early Fall vacations will welcome the announcement of Bargain Fares to the Pacific Coast by C. G. Taylor, Canadian Pacific Ticket Agent.

Tickets will be on sale September 4th to 10th inclusive, with thirty day return limit, and will permit stopover at Calgary, Nelson and stations west.

A feature of these fares will be the privilege of tourist or standard sleepers at slightly higher rate and usual berth charge. The special tourist fare good in coaches will also be available.

The early Fall is usually a delightful time to visit the Coast, and present indication point to a record travel; those contemplating the trip would be well advised to get in touch with Mr. Taylor as early as possible.

## An Insurance Policy

Writers in some of the Eastern Canadian publications are spilling a lot of ink on the subject of conditions in the prairie provinces and are advocating drastic measures. Even to the extent of abandonment of the land to its original inhabitants, the quakers and the Indians.

In some articles, quite patently written by authors not fully conversant with the situation, it is suggested that the will has been robbed of its fertility—has played out, in fact, and is no longer capable of producing crops even if an abundance of moisture were available.

The people on the ground, the farmers and businessmen resident in the prairie provinces, do not seem to be stampeded by any such suggestion. They know better. They are fully aware that, given the essential moisture at the right time, the prairies are capable of producing quality grains in great abundance and this is being demonstrated to the world in the Province of Manitoba and in comparatively small areas of Saskatchewan and Alberta this season.

The findings of Captain Palliser in his report on the entire area to the British government, 1856 to 1860, have been confirmed recently in surveys made by the Dominion Forestry Service and the Seale Grain Company, the latter based on observations and records over periods ranging up to 40 years. These reports demonstrate that what Palliser designated as the "semi arid" belt, taking in roughly the open prairie areas of southern Saskatchewan, southern Alberta and southwestern Manitoba, have yielded 13.25 bushels per acre on a long time average from eleven million acres in wheat on an average precipitation of 10.38 inches per annum, exclusive of snow-fall, compared with an average yield of 19 bushels an acre in what Palliser termed the more northerly "fertile" belt on an average rainfall of 12.63 inches over nine million acres needed to what area.

These territories and figures do not include what now may be regarded as a definitely arid area in which four million acres have been needed to wheat.

Excluding the latter the long period records show that in the so-called semi arid belt a crop failure from drought may be expected on an average of one year in four and in the fertile belt an average of one failure in nine years.

As pointed out by Major H. G. L. Strange in an article in "Canadian Business" these crop failure records do not occur with mathematical regularity but, and particularly in the case of the semi arid belt, come sometimes in cycles of two, three or even more years in succession.

While Major Strange is assured that this year marks the culmination of drought severity and crop loss he does not go into the causes of the cumulative drought of the past few years, but there can be little doubt that its severity has been aggravated by cultivation methods over a period of years which have involved the drainage of the multiplicity of sloughs which in former times were the life of the area.

What has happened is that the earlier settlers found that they could at least in good years, harvest very large yields in the proximity of the sloughs and came to the conclusion that areas covered by water were so much waste land which, if drained, could be made to yield heavy crops. Accordingly all over the prairies these sloughs were drained off and the land beneath these moisture nurseries was converted into wheat fields.

Fortunately, with the passage of time, it has been found that this may be a long and painful process. The country-to-day faces the problem of restoring these natural basins so that they, in the course of natural processes, may transpire moisture to the atmosphere and aid in the formation of rain clouds. Some attention is being given to this kind of problem by the P.F.R.A. which, as Major Strange says, is "sitting about the problem in a vigorous and effective fashion."

This work, however, does not solve the whole problem for the semi arid area or even the fertile area which, according to statistics, are subject to crop failures in every four and nine years respectively. The problem for the farmers in these recurring dry years can only be successfully solved by making available large quantities of water which can be stored and drawn upon when needed in the form of irrigation projects.

Irrigation projects, large and small, wherever feasible must be resorted to as a supplement to the restoration of shallow waters in natural basins, as an insurance policy against losses in future drought years whether they come singly or in cycles.

Such an insurance policy put into effect to its maximum degree and within the bounds of economic feasibility will place agriculture on the prairies on a more assured basis, provide work for many who need it, eliminate dead-loss direct relief expenditure and do away with all talk of abandonment of land, except for a very small area which never should have been broken by the plow.

## Old Controversy Revived

No One Knows How Poppys Pronounced His Name

The old controversy over the pronunciation of the name Poppys has been revived once more in the correspondence columns of the London Observer. Ought it to be Poppys, or Poppie, or Pops? One correspondent has even discovered a contemporary verse in which it is made to rhyme with "ips" but the question, of course, has been only poppy license.

No one can answer the question definitely now, at least not one unadvised proof positive. Indeed it must have been a problem to Poppys' contemporaries; for they spell his name in no less than seventy different ways and since the spelling of proper names was apt to be somewhat phonetic in those days, this seems to indicate some difficulty of pronunciation as to its pronunciation.

It is odd that he, who told us in such a wealth of detail about himself should have left this point to be disputed.—Christian Science Monitor.

## Requirements Not Known

Thatcher What May Be Obtained For Drought Area Exposed

Efforts are being made by the Saskatchewan Government to obtain as much Thatcher wheat as possible for distribution next spring. It has been estimated that the province has half and one million bushels of this variety of wheat through the Canadian wheat board. Additionally, a number of other early maturing and rust resistant varieties of wheat will also be purchased although the total seed requirements for next spring are not yet known.

## Hard On The Ladies

Curly hair has been outlawed in Chengtu, China, official objection to permanent waves as ultra-modern and a waste of money. Permanent wave machines were confiscated.

There are 14,324 miles of railways in the Union of South Africa.

## Keep The Best

Shoppers in Scotland Reluctant To Part With Wares

In reply to the American complaint that London shoppers leave customers to sell the goods to themselves, the columnist of the Morning Post declares that Scotch shoppers are even more reluctant to part with their wares. For example:

"Some months ago a friend of mine was golfing at Carnoustie. He had left his watch at Perth to be mended, and sailed forth to buy a cheap suit. He found a well-shopped, kept by a quaint little Scot, and the following dialogue ensued: 'I want a cheap watch.'

"How cheap?"

"The cheapest you have."

"There's one I can give you for five shillings. My cousin's had the like of it for two years, and it still keeps good time."

"But it's too large for my pocket."

"Well, there's a smaller one, but it's dead—'76, '81."

"I don't like the pattern on the back."

"Here's a bonnie wee watch, but it's terribly expensive—'82, '83."

"I'll take it."

"As the vendor was handing out the change, he said: 'Oh, come, I'd far rather watch than that, but it costs too much—'84, and nobody'll say it, so I just keep it for swank!'"

—Charles Town Guardian.

## Curious Race Incident

Winner Refused To Appeal Wrong Decision Of Judge

Accidents happen even on the best-regulated racetracks, and one of the most curious incidents in the history of the Turf occurred at Goodwood.

The judge was so intent upon watching the struggle between the leading horses, running neck and neck, that he failed to notice another slipping ahead of them on the outside of the track.

The third horse shot past the winning-post well in front of the other two but the judge sent up the number of the second horse as winner, leaving the Duke of Richmond's Dandee displaced in a race it had won by three lengths.

The Duke refused to appeal, telling the repentant judge, "I have always heard that justice is blind; now I know it!" What Dandee's backers thought is unrecorded.—News of the World.

## Promises To Return

"Next year we will come to America every two weeks with new helium-inflated Zeppelins," Captain Max Pruss, commander of the ship Henry Hindenburg, said as he planned to leave the New York Medical Center to return to his home in Germany. It was his first interview since he and his ship went down in flames at Lakehurst, N.J., three months ago.

## Want Shorter Name

Citizens of Wilkes-Barre, Pa., corner, a little community a mile south of Brazil, Ind., are tired of saying and writing the name of the place which is as startling as Einstein's discovery of the curvature of space-time and somewhat analogous to the relativity theory. "Wilkes-Barre" is also a long name when he offered the word, they then believed theory. Sambar, German bar, has been a quiet, unknown scientific worker in Jerusalem since 1924, except for two years of science work in Holland.

The American scientist found in accepting his article considered both its worthiness and Sambar's standing among scientists who know him.

His evidence of shrinkage comes from recent discoveries made with the world's largest telescope at Mt. Wilson, California. This telescope shows that apparently the nebulae, which are island universes of stars, way out at the edge of visibility, are all rushing away from the earth.

## Offers Great Market

United Kingdom Consumes Enormous Amount Of Food Products

Some idea of the enormous amount of food products consumed in the United Kingdom may be had from the London Times which reports that in 1936 imports of butter amounted to 290,000 tons, which represents more than four-fifths of the butter entering world trade.

This great market absorbs more than one-half of the cheese and eggs entering world trade, and practically all the bacon. In spite of increased costs for food products, consumption remains steady, the purchasing power of the consumer in Great Britain being increased through industrial activity and greater prosperity.

It is only since 1939 that science has realized the human body is composed of individual cells.

## ALICE STEVENS' RECIPES

FRUITS WITH PECTION RECIPE FOR JELLY

Are your jelly glasses all filled yet? If not, this is the time to get busy. Jelly and toast are used not only at breakfast time, but are very popular for teas and lunches. There must be some jelly for jelly-roll and layer-cake decorations.

Acid and pectin are the two essential ingredients in making jelly. Either of these, it is impossible to make jelly. If pectin is lacking, some commercial acid fruit should be used. Apples are rich in both acid and pectin and for this reason they form the base of many of our jellies. Our grandmothers knew this and they often combined apples with other fruits in making jelly.

A small cotton bag is used for draining off the juice. An empty 20-pound sugar sack makes a convenient size. Do not squeeze the jelly-bag while draining, as this causes cloudy jelly. Allow the bag to drain overnight, and if the fruit is rich in pectin, a second extraction can be made.

Most of the pectin is found in the seedings of the fruit. Do not peel the fruit, but cut into pieces, so that the cores are exposed and the pectin can be extracted easily. Excellent jelly can be made from the seeds of apples and peaches which have been left when a big dish of applesauce is prepared.

This is an excellent way of replenishing the jelly supply in the winter.

The length of boiling is very important and rather hard to estimate. If overcooked, the jelly is tough and does not set. When the boiling is nearly completed, a little can be tried on a cold saucer. The test that I find most satisfactory is called the "sheeting" test.

Put a spoonful of the liquid on a spoon and watch as it begins to thicken. The liquid should seem quite watery, but as the boiling is completed, two drops form side by side on the edge of the spoon.

The jars do not need to be sealed until the very last. The large amount of sugar present acts as a preservative and the jars should be covered with paraffin and then a paper fastened over the top, to keep out the dust.

## APPLE JELLY

Wash and cut the apples into small pieces. Cover with cold water and boil until the apples are soft. Put in jelly-bag and drain overnight. Put the juices on the stove and boil from eight to twelve minutes. Measure the juice and add an equal amount of sugar which has been heated. Boil the jelly until two drops form side by side on the spoon. Strain the jelly into hot sterilized glasses.

APPLE SYRUP FOR HOT CAKES

Wash and stem McIntosh apples. Put on to boil slowly, using as little water as possible. When thoroughly cooked, let drain through jelly-bag. Return the juice to the kettle and boil quickly until condensed to a thin syrup consistency or until a light skim of jelly forms on top. Skim this off and add very gradually sufficient sugar to suit taste. Do not let the syrup boil after adding this sugar. This prevents the syrup becoming jelly. Dissolve the sugar by stirring. Put in hot sterilized jars as for preserved fruit.

Readers are invited to write to Alice Stevens' Home Service, Fentonville, B.C., for free advice on home cooking and household problems. (Please mention this paper).

## Sheep And Swine Shows

Sheep and swine shows will be held at Saskatoon on October 27, 28 and 29, and at Regina on November 2, 3 and 4. It is the intention of the fairs of the Saskatchewan Sheep and Swine Breeders' Associations. The program of the shows will be similar to the Saskatchewan exhibit at the Toronto Royal Winter Fair.

## GIRL SETS NEW RECORD DESPITE INJURY

A seventeen-year-old girl, Miss Dorothy Odum, set a new British high-jump record for women at the A.A.A. championships in London when she cleared 5 feet 4 and 3/4 inches. Two days before the event she injured one of her ankles and it was twice its normal size when she broke her new record of 5 feet 4 inches.

## The Weekly Newspaper

One Of The Most Potent And Lifting Factors In Our Existence

Printing from the city newspapers to the small town press exchanges that come to the editor's desk is like stepping from the slums, full of vice into an old-fashioned garden, sweet with lavender and thyme, and the scent of perennial flowers. The pages of the big dailies are so full of crime, thievery, immorality and selfishness that the better news is obscured by glaring statements of the Decalogue. One puts the paper aside with a feeling of depression and heartache that the world is full of terrible and unhappy things.

Then picking up the papers that record the happenings of the little towns around us, one gains renewed faith in life. Here are set forth only that which uplifts a community—the activities of the business men, the church men, the happy social gatherings of the people, farmers' items and all the thousand and one daily occurrences that make up the simple annals of the great common people, who are really the foundation of this broad country of ours.

Scandals are rarely published in the country newspapers, but if it so happens that decency demands it, the uglier details are omitted or given in a kindly touch that is widely different from the unfeeling publicity of the city press. The offenders may be our neighbors or people we have rubbed elbows with all our lives. They are real human beings to their neighbors, but in the great city dailies they are merely grains of a sort that are ground out hourly in their news mills.

Sometimes people speak lightly of the country newspaper, but it is one of the most natural and uplifting factors in our present existence.—Boston Monitor.

## The Official Title

Burma Is Now Overseas Territory Of The Crown

Citizens of Burma have been worrying themselves as to what the exact designation of their country should be since it was separated from India, observes the Indian Press Union.

No one dared to call it a colony because that would savor too little of democracy. The word "Kingdom" was rejected because it might be misleading, while the designation "Province" is not now permissible. The problem has been solved by the officials in London who now designate Burma as "Overseas Territory of the Crown." As this is a long title, it is understood that the letters G.O.C. will be used when alluding to Burma.—Winchester Star.

## Canada's Coal Production

The production of coal in Canada during June amounted to 1,068,865 tons as compared with 1,037,700 tons in the same month of last year. In Saskatchewan, the production amounted to 22,485 tons, a decrease of almost 4,000 tons from the output in June, 1936.

The average man's lungs contain about five square feet of air.

There are approximately six million blind people in the world.

## A HIGH ROLL TIME

Ogden's Fine Cut puts you on the right track to the high spots of smoking satisfaction. With this finely, fragrant fine cut, it's all in new packs of pleasure in caring for you. Particularly if you're in the world on the best cases—"Cigarette," or "Vogue". There's a bigger 15c package of Ogden's.

OGDEN'S FINE CUT CIGARETTES

## British Merchant Marine

Fewer British Merchant Vessels

Establishment of a ministry of marine is advocated by Paymaster-Lieutenant-Commander E. C. Talbot-Both in a foreword to his reference work "Merchant Ships, 1937."

Declaring there were 1,000 fewer British merchant vessels abroad today than in 1914 and the average size of ships was greater, he said, "in times of national emergency it is necessary that some, not more, and even with our greater numbers during the war we were brought to within a few weeks of starvation."

He said the British fleet across the Pacific was almost broken. Japanese and United States ships were driving British ships out of the Pacific, bringing cargoes under British noses. State assistance and subsidies might be pernicious in principle but when rivals were using them Great Britain must take up similar weapons.

"Unless a ministry of marine is instituted without delay, Britain will be in a bad way, he concluded.

"If it were necessary to control British shipping in time of war, it is necessary to control it in times of peace or economic war, and there need be no fear of individual interference in the legitimate trading aspirations of individual companies."

Iron And Steel Products

During 1936 there were 14 plants engaged in the manufacture of iron and steel and their products in Saskatchewan. These had capital employed to the tune of \$1,400,750 and paid \$237,000 in salaries and wages to 258 employees.

Cold moist air feels colder to a person than cold dry air.

RENEWAL  
SUBSCRIPTIONS

TO THE  
CHRONICLE

A representative has been appointed in your district, and is authorized to accept subscriptions at \$1.00 per year, for 5 weeks, commencing September 6th. to October 9th. Your co-operation with our representatives will assist them in earning substantial cash commissions during the life of this special offer. The management will also appreciate your co-operation. We have tried to be as liberal as possible under present conditions, by splitting the subscription price (\$1.50) three ways; one third off to our subscribers, one third to our representatives and one third to ourselves. We know you will agree, we have done our part in making it possible for you to have your subscription up-to-date. Your kind attention and support at this time will be of great assistance to us in the task of producing a Newspaper.

*A special donation of 2 percent of the total collections, will be divided between the Champion Community Hall, and Carmangay Hospital.*

Publisher

Thursday, September 2nd, 1937

This week we are making a special announcement regarding the subscription end of the business.

What we desire to do, is to have every family in the district paid in advance. We are making this possible for you by reducing the rate to \$1.00 per year for the next five weeks.

We are not collecting any arrears, if you owe any it will be payable to the former owner.

We want you to start with the present management with a clean sheet. For the small sum of \$1.00 your paper will be paid in advance for one year.

You may contact any of the field representatives, or mail your dollar direct to the Chronicle and a receipt will be issued to you from September 1937 to 1938.

We trust you will give us your sincere co-operation in this dual proposition, making it possible for you to start with a clean sheet, and assisting us to build up a subscription list that will be of real value to us and our advertisers.

Representatives have to be appointed in some districts yet, and as soon as this is done within the next few days, their names will be published in the next issue of the Chronicle.

Remember every one your subscription gives your local representative 1000 votes, two year subscriptions, 3000 votes. The special offer dates are from September 6th, to October 9th, both dates inclusive.

#### The Opportunity for Self-Help

Being a strictly co-operative grain producers organization, Alberta Pool Elevators claim that the policy of self-help is one calculated to achieve the best results. In other words grain producers can achieve more for themselves by undertaking to build up non-profit grain handling organizations. Unquestionably farmers can progress further by a policy of self-help.

#### Carmangay News

Ira Burns of Seattle arrived here Monday to visit relatives in the district.

Mr. and Mrs. Simpson of Lethbridge have been visiting Mr. and Mrs. Ross at the Grange hotel.

Mr. and Mrs. Robertson have returned to town from their holiday. Mr. Robertson is principal of the school.

Mrs. F. M. Thompson of California, arrived last Friday and is the guest of Mrs. Wm. Pencock and Miss Joy Pencock.

Miss Jean Bluns of Calgary, arrived Tuesday and will assume her position as teacher at the Carmangay school.

The nurses are now occupying their new quarters over the town office, this allows more accommodation in the hospital for patients.

Mr. and Mrs. O. L. Taylor have returned from their pleasant fishing trip near Elko, B. C., while there they were visited by Mr. and Mrs. C. H. Messinger from Creston.

Walter Mercer of Strathmore was a week end guest at the Folk home. Miss Mary Folk returned with him to Strathmore where she is teaching school.

Ed Cook and family, Carmangay west, motored to Calgary Tuesday. Miss Vera Atkins accompanied them, and proceeded to Crossfield where she is attending High School.

Miss Stockwell has been appointed teacher at Barwash school, which reopens after being closed down for five years, during which time the few pupils were brought into the town school.

The majority of the farmers are harvesting their crops this year on account of the unevenness in ripening, and the weeds in the grain, a large percentage has already been done. Some grain has been shelled out by the wind.

#### Beloved Pioneer Of District Called By Death

Mrs. Carl Stettner, Carmangay east, passed away at her home on Monday afternoon, August 30th, from heart failure. The funeral took place at the house on Wednesday at 2 p. m., with Rev. Smith conducting the service. Mrs. Stettner was an old timer of the district. She was always a cheerful and willing worker in any community affair and will be greatly missed by many friends. She is survived by her husband, three sons, Edward, Charles and Herman and daughter Joy.

#### HOSPITAL NOTES

#### FINE LECTURE BY MISS MCINTYRE

On Wednesday, August 25th, twenty-five members and friends of the Women's Institute gathered in the United Church to hear Miss McIntyre of Olds give a talk on "Social and Family Relationships". The meeting opened with the singing of "O Canada" and the reading of the Obituary of the Rev. Mrs. C. McLean, accompanied by Mrs. J. Walker, rendered a very pleasing vocal solo.

In introducing her talk Miss McIntyre said she would discuss first family relationships. The great work of the home is to produce solid, reliable and satisfactory citizens. We need the co-operative home where there is no favoritism. Every person will be working for the good of every other person. Affection should be the basis of the home life. There should be no pampering, no dominating, no teasing from adults; children should never be given any reason to doubt their parents' love for them. Home should be the place where they can tell all their troubles, and can have a feeling of security leading toward the development of that inner peace which we all need. There are so many reasons why people have a "inferiority complex." It is only through the realization that there is something they can do for the good of the home or of the community that this can be lost.

Patience should be developed in the home—it is one of the greatest characteristics leading to emotional stability, so badly needed in the world today. We do need people who can wait for the good of the future.

In the home the culture of the ages should be passed on—in language and literature, in music and in art. From the National Gallery of Canada, Ottawa, can be obtained, for about twenty cents, prints of paintings by the best Canadian artists, suitable for framing.

In the community bickering and quarrelling should be avoided by the cultivation of a more understanding spirit. People who seem to be trying to hurt others often feel insecure themselves. And there are many people who are too sensitive—too easily hurt. "He who lives most closely and great understanding never has hurt feelings."

As an antidote to worry, Miss McIntyre recommended the reading of Ralph Waldo Emerson's "In Tune With the Infinite." She also recommended for general reading "If I Have Four Apples" by Josephine Lawrence, and "Wake Up and Live" by Dorothy Bane.

At the conclusion of her inspirational talk, Miss McIntyre was heartily thanked by Mrs. Headley, President of the Institute, for the message she had brought. Those who heard her felt that they had listened to a very worth-while public address—something which we hear in Champion all too seldom.

After the singing of the National Anthem, a committee centred by Mrs. Freese served delicious refreshments.

#### VISIT THE PLOTS

At every point where a Searle (Home) elevator is situated, nearby will be found a "Crop Testing Plan" demonstration plot. The newest and best varieties of wheat, oats and barley have been sown, so that farmers and others may observe which varieties are best suited to each district.

All farmers and business men are cordially invited to visit the plots.

See the nearest Searle (Home) agent about the plot in your district.

have a drink of the icy crystal clear water. There was a large frog hopping around in the water soaked foliage. In the air were many beautiful butterflies, their coloring was gorgeous. On both sides of the path, the pine and the fir trees towered far above like massive giants.

Just then I saw a chipmunk pop up from the green foliage and scamper up a near by tree. He was about the size of an ordinary gopher, a rich reddish brown color with three black stripes down the back. Some of the ladies being tired, we all walked back. The men came back, and without any fish. They didn't even get a
